

Participant No.: Connect_004

Profile Summary: Combines three years as a professional fullstack developer (React/TypeScript frontend, Java/Spring Boot backend, agile enterprise teams) with several years as a U.S. federal regulatory analyst and a support/coordination role at a German industry association. This combination brings an unusual ability to move fluently between hands-on technical work, structured analytical work, and cross-team coordination. Currently open to roles in software development, project coordination, team assistance, or user support.

Core Competencies

- Analytical & Regulatory Thinking
- Cross-Functional Collaboration & Stakeholder Communication
- Fast Adaptation to New Domains
- Structured, Detail-Oriented Work
- Team Support & Mentoring

Key Skills and Tools

- Software Development: React, Angular, TypeScript, Java, Spring Boot, REST APIs
- Analysis & Regulatory Work: Regulatory/compliance analysis, KPI development & reporting, contract/policy literacy
- Coordination & Support: Project & task coordination, user support (DE/EN), software/tool selection & implementation
- Data: Database maintenance, web application data integration, analytics & tracking

Language Skills

- German - C1 / Business fluent
- English - C2 / Mothertongue
